DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

The disclosure is objected to because of the following informalities: There appear to be spurious underscore marks “_” on page 8, line 18 and page 9, line 7. The examiner also notes that the word “dimensional” has been spelled throughout the specification with a t. This is not a formality which needs to be corrected in the written specification because it is clear what the word is. However the examiner requests that the spelling is corrected at least in the title of the invention.

Appropriate correction is required.

Claim Objections

Claims 1-15 are objected to because of the following informalities: The word “dimension” is spelled with a t rather than an d. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 2851

It is unclear in claim 1 if a single prism cell is being claimed or a plurality of prism cells are being claimed.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for the purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Hosterman, Jr. et al. (U.S. Patent No. 3,208,341). Hosterman teaches a 3D projection screen comprising a projection screen 36 and a prism panel 38 formed with prism cell having a plurality of disperse surface 46/48. The applicant is directed to review figures 1-3 as well as col. 1, line 10, and col. 3, lines 1-17.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
